

## Highlights

### Save Cost and Time by Automating Network Configuration Compliance

- Manage complex compliance regulations, pass audits and avoid penalties across the entire network
- Easily create and maintain compliance baselines and determine your network configurations ongoing compliance to HIPAA, PCI and GDPR
- Augment endpoint solutions to extend automated compliance reporting from devices to network configurations
- Eliminate multi-day manual audits with regularly scheduled automated assessments

### Lower the Risk of Compliance Breaches

- Receive alerts to changes in network configurations that are out of compliance with HIPAA, PCI and GDPR
- Schedule regular network configuration compliance assessments with records of the analysis and scoring
- Prepare for audits with compliance data, scoring and assessment trails
- Track compliance changes over time

## ExtremeCompliance

(Formerly Information Governance Engine)

### Reduce Risk and Save Cost With a Fully Automate Network Configuration Compliance Solution

Managing a complex network architecture is difficult and costly. As IoT devices continue to grow in number and importance across your networks, security becomes more challenging. For your network to securely accommodate this explosion in connected devices, you need to make sure these devices are either separated from one another, or receive a security policy aligned with their posture and purpose. But the separation of devices across distinct networks comes at a cost – complexity – and with complexity comes risk. Risk of a misconfiguration, incorrect classification, or failure to comply with industry standards such as HIPAA, PCI or GDPR.

Imagine, you come into your office in the morning and see compliance risks for network configurations on a simple dashboard. The information has all been analyzed for you automatically.

Our fully automated ExtremeCompliance compliance solution was designed to automatically analyze and assess network configurations. Our solution analyses the configuration of your Extreme wired and wireless network including wireless events such as rogue APs, all the way into the datacenter. Our compliance solution helps you determine the compliance readiness of your network configurations for HIPAA, PCI and GDPR. Audit-driven and user defined compliance templates and scheduled reports are available out-of-the-box to help you demonstrate diligence and progress on your baseline when it's time for an audit. Our solution enables you to reduce risks and maintenance cost.

Malware, ransomware, identity theft and data breaches are rising, and you want stronger protection to keep customer data safe. Compliance audits are becoming more frequent and putting a strain on your limited IT resources.

To save cost, your organization needs to automate network configuration compliance assessments. That's why we developed our ExtremeCompliance as an optional add-on to your existing ExtremeManagement license.

## Ordering Information

Part Number	Product Description
85108	ExtremeCompliance - Up to 10 Devices
85109	ExtremeCompliance - Up to 25 Devices
85110	ExtremeCompliance - Up to 50 Devices
85111	ExtremeCompliance - Up to 100 Devices
85112	ExtremeCompliance - Up to 250 Devices
85113	ExtremeCompliance - Up to 500 Devices
85114	ExtremeCompliance - U Devices

## Warranty

As a customer-centric company, Extreme Networks is committed to providing quality products and solutions. In the event that one of our products fails due to a defect, we have developed a comprehensive warranty that protects you and provides a simple way to get your product repaired or media replaced as soon as possible.

The Management Center appliance comes with a one year warranty against manufacturing defects. Software warranties are ninety (90) days and cover defects in media only. For full warranty terms and conditions please go to: <http://www.extremenetworks.com/support/policies>

## Service and Support

Extreme Networks provides comprehensive service offerings that range from Professional Services to design, deploy and optimize customer networks, customized technical training, to service and support tailored to individual customer needs. Please contact your Extreme Networks account executive for more information about Extreme Networks Service and Support.
